

ICBM Meeting with client via phone conference

2:30pm November 15, 2011

1 Attendance

- Scott Beddall
- Brett Hitchcock
- Chaylo Laurino
- Alex Nilson
- Stakeholders

2 Login system

- We aren't able to use Active Directory - it's only for Windows Server 2008
- We're trying to use LDAP authentication instead
 - Scott using Apache Directory Service
 - Able to do queries and access the database normally, but can't make it work in C#
 - Client suggested using a packet sniffer to find the problem
 - System should be easy to port to DHW's Active Directory system - well commented and modular

3 Etc.

- Unable to write to Active Directory, so we're going to need another table for task/user assignment
- Possible future meeting with security team to iron out LDAP/AD specifics
- No meeting next week due to Thanksgiving.
