

Client Meeting

2:30pm February 27, 2012

1 Attendance

- Zeke Long
- Nathan Mazur
- Marj Sanderson

2 Conversation With Client

- We abandoned Apache server workaround and commented out login stuff
- The client has a server up and running. We'll have access as soon as the client gets a security response. (Should be tomorrow)
- After this week, we'll have an updated timeline that better reflects where we were at
- Client is getting us about 13 user stories tomorrow afternoon
 - We have a conference meeting on Wednesday to go over them

3 Things To Do By Next Monday

- Most of the DATA requirements
- A prototype that the client can see
- Connection strings and everything related to Active Directory
