

ICBM Meeting via Skype

7:00pm November 7, 2011

1 Attendance

- Scott Beddall
- Brett Hitchcock
- Chaylo Laurino
- Alex Nilson

2 Status update and planning

- Working on getting IIS and Visual Studio working for everyone.
- Manager controller has basic database details and DBContext examples.
- Models act as database schemas in this mvc, which wasn't how we originally thought they worked
- We need to code up forms, but we haven't gotten that information from the client yet
- Need to make a tasks database and a database for associating tasks to work efforts
- Hours need to know which task they are associated with

3 Tomorrow's agenda

- Get forms from client
- Give client a status update
 - We've got tasks figured out
 - details on other backend functionality
