

# Client Meeting

2:30pm March 26, 2012

## 1 Attendance

- Zeke Long
- Nathan Mazur
- Marj Sanderson
- Mike
- Brad
- Julie Grunder
- Steve Hill

## 2 Conversation With Client

- We have the project partially running on the server
  - We still have to create the database and tables using SQL Server Management Studio
  - Pete is working on installing SQL Server Management Studio by tomorrow
- We need to start including Steve Hill in the CC on emails
- We have made a lot of progress on Timesheets and PCA code User Stories
- We still have to finish the automatic locking of timesheets two days after the pay period ends
  - (with the option to extend to 3 days if there is a holiday)
- We still have to make TARS send the user email alerts
- Nathan is working on:
  - making sure we are using IIS 6

- working with LDAP stuff
  - Creating the database on the DHWTarsd1 server
- Zeke is working on:
  - Adding database tables for Company/Division/PCA codes/work effort associations
    - \* (necessary in order for dropdown selection lists to be possible)
  - Updating TARSUser and WorkEfforts tables to comply with client's requirements
  - Dropdowns when adding and editing PCA codes, work efforts, and hours on timesheet
