Client Meeting

2:30pm February 13, 2012

1 Attendance

- Zeke Long
- Nathan Mazur
- Dr. Jeffrey
- Marj Sanderson
- Marty (IT business conduit)
- Brad Avero (Marty's supervisor)

2 Things we've done since last meeting

- Assigned short-term tasks
  - Zeke is working on logins, authentication, and back-end stuff
  - Nathan is working on the beginnings of the visual layout
- Spent at least 8 hours trying to get logins and authentication working
- Contacted Scott about website and LDAP workaround using Apache
- Revised our goals according to what the client wanted us to change/update

3 Conversation With Client

- Mentioned that we have been in contact with Scott about website stuff (Apache workaround)
- Julie is close to getting us an Active Directory to work with.
  - Server that we can use as our "playground" for development (IIS, ASP.NET, etc.)

- Client is getting us "user stories" that will help us with development. Hopefully by next week.

- Dr. Jeffrey: To what extent does the view of the data need to be customizable?

    – Marj: User can choose what they want to be visible on their timesheet (Like if a user is working on the same thing from week to week, they can duplicate ...)

- Nathan is emailing Larry Hughes about obtaining permissions to update our team website

4 Things To Do By Next Monday

- Update website (sdd, minutes, etc.)

- Logins, Authentication, Registration

- Visual elements

- As much progress as possible
