ICBM Meeting with whiteboard

12:30pm October 20, 2011

1 Attendance

- Scott Beddall
- Brett Hitchcock
- Chaylo Laurino
- Alex Nilson

2 Website layout

- First screen will be the "home" screen
    - Welcome message
    - Updates/system announcements
    - Login
- When logged in top bar will have logo on the left, userid and other info on the right
- When not logged in top bat will have logo on the left and login button on the right
- After logging in, user will be taken to the user, manager, or admin page depending on their role in the user database

3 Controllers

- User controller
    - addHours function for adding hours to a work effort
    - viewHours function for viewing their hours
    - storeFile function for attaching files to work efforts
    - viewHistory to view what they've been doing

- Manager controller

  - Subclass of user, so it inherits all user functions
  - createWorkEffort function for adding a new work effort to the database
  - viewWorkEffort for viewing work efforts
  - approveHours for approving hours that have been attached to a work effort
  - editWorkEffort for making changes to a work effort in the database
  - viewHistory modified to allow managers to view the history of any user

- Admin controller

  - addPCA for adding new PCA codes to the database
  - viewPCA for viewing PCA codes
  - editPCA for modifying PCA codes

4 Questions for customer

- What's the difference between managers and admins?

- What do permissions do?
